

# About The Project And Us

## About The Project

This assignment is for IS117-101 Fall 2020. This project is designed to teach us how our information is collected on the web. While some of the times that can benefit us, in some cases it can be harmful. We will cover some cases where that data is used and how you can choose to remain anonymous if you don't see benefit.

## About Us

My name is Sean Rogawski. I'm a senior at NJIT. I am practicing my web page design skills and working on making modern and sleek looking pages.

My name is Nicholas Kafarski, and I am also a senior at NJIT. Web development is not a strong suit of mine, which is why I learn more about it every day! I hope to become a data analyst out of college, and web development will aid me in succeeding!
