About The Project

Learn about why this website was created as well as a little bit of information about its creators.

Purpose

This assignment is for IS117-101 Fall 2020. This project is designed to teach us how our information is collected on the web. While sometimes that can benefit us, other times it's harmful. We'll cover some cases where that data is used and how you can choose to remain anonymous if you don't see benefit. Having a modern design and feel, this is best presented for the average internet user, and young adults in general.

About Sean

My name is Sean Rogawski. I'm a senior at NJIT. I am practicing my web page design skills and working on making modern and sleek looking pages.

About Nicholas

My name is Nicholas Kafarski, and I am also a senior at NJIT. Web development is not a strong suit of mine, which is why I learn more about it every day! I hope to become a data analyst out of college, and web development will aid me in succeeding!

ONWARD

This page is created and brought to you by Sean Rogawski and Nicholas Kafarski. Additional resources can be found in the following links.
